

Mines of the County

M. A. Burke, who is the owner of good looking mining prospects at Stockton Hill, was in town several days this week.

A. F. Muter and several mining men paid a visit to Copperville and the mines of Copper Canyon this week, taking in some other inviting properties on the trip. The men appeared to be well pleased with the outlook of that section of the county from a copper standpoint.

W. E. Dunlap, of the Pacific Investment company, was a Kingman visitor this week and reports that the mines near Cerbat are looking prosperous. The work of developing the mines is being carried on by a large force of men and steady shipments to the smelter will soon be resumed.

Kean St Charles was in from his Midnight mine the first of the week and reported that nearly a carload of concentrates had been turned out by the plant on the property. The values in the dressed material is good and it is probable that the plant will be continued in operation indefinitely.

This week Robert Jacobson received authority from C. L. Davidson to begin work on a mining property in the Aubrey district and the money to carry on the work was forwarded to the bank here to cover all expense of the proposed development. The vein is said to be about four feet wide and to carry values across the entire width of forty dollars to the ton. The ore can be readily milled on the ground and a good saving can be made by cyanide methods.

It is reported that the shaft on the old Sonoma mine, at Silver Hill, near Chloride, has been sunk to a depth of 100 feet and that drifting is now being done on four feet of ore. This ore is said to be all shippable and that a still greater vein has been opened that gives good milling values. A carload shipped to the smelter gave excellent results and as soon as the stopes can be opened on the 100 level steady shipments will be made. This is one of the old mines that has been idle many years, but which an intelligent prospecting has developed into a big mining possibility.

Thomas Tighe, who returned yesterday from Salt Lake City, where he attended the funeral of the late George E. Gunn, will take up the development of the old Hackberry mine, where the death of Mr. Gunn last week interrupted it. It is understood that Mr. Gunn's estate and W. B. Thompson, of Thompson, Towle & Co., will continue the work and that matters will go on uninterruptedly under the present management. Mr. Tighe has been with these people many years and is regarded as one of the best mining men in the business.

Ed. Williams and wife disposed of his ranch on the Big Sandy to a man named Johnson, the price being stated at \$3,200. The ranch is one of the best on the Sandy and in the hands of a farmer ought to be a big paying investment. Mr. Williams will remove his family to Willow Springs, in the Aquarius range, close to the tungsten properties, which will be worked. A milling plant is to be erected at the springs and the ores from the mine treated for shipment to the eastern ore buyers. There are many hundred tons of milling ore now in sight and the possibility of many thousands being opened with a small amount of additional work.

John Hansen, one of the well known miners of the Eldorado Canyon section, and who has been prospecting in this county off and on for years, passed through Kingman a few days ago on his way east to confer with his company. He has been operating a group of mines in Eagle Wash, close to the Canyon, and at a depth of 200 feet has driven a drift along the vein. A cross-cut has disclosed 30 feet of ore, six feet of which, on the hanging wall, averages better than 50% in gold, silver, and lead. The whole vein will make an excellent milling proposition. The mine is situated about six miles above the old Gracey mill. It is the intention of Mr. Hansen to develop the property to an extent that will justify the erection of a milling plant for the treatment of the ore. He and other believe that the mine is one of the greatest properties in the Eldorado Canyon district.

Copper Giant Group Bonded.

Last Saturday the Copper Giant group of mines, about eight miles east of Hackberry, was taken over on bond by William Neagle, of Jerome, for the interests of the Clark people. The mines had been examined by the engineers for the Clark interests and the surrounding claims were drawn into the group and will be taken over at the same time. It is one of the considerations of the bond that a large force of men are put to work on the properties within thirty days and that ore shipments will soon thereafter be made to the smelter. Royalty from this ore will be paid to the owners of the group, which later will be applied on the purchase price.

It is claimed that the ore is ideal for the purposes of the Jerome smelter and that large shipments will be forwarded just as soon as the Copper Giant can be put in shape to send out its product. At least thirty men will be put to work on the mines next month and work rushed on all the properties that show values. The Giant is one of the best appearing claims in the group and it is on this that work will for a time be concentrated. The mines are held by a number of interests, which will share in the sale prorata, the title being vested in W. K. Ridenour.

Nice Bar of Bullion.

Last Tuesday Walter Myers came in from the Frost ranch with a fifty ounce bar of bullion, taken from two and one-half tons of ore from the new strike at that place. The ore was milled at the Last Chance mill, the men getting the cleanup and also 150 pounds of concentrates that will average one dollar a pound. This is a great showing for the ore from the new strike, and proves conclusively that the gold is there. Mr. Myers also showed some gold nuggets that he got in the panning from the surface at the mine, some of them weighing nearly 10%. The company of owners in the property have just made a deal on the mines, the purchase price being placed at \$110,000. Under the option work is to be commenced on the mines within thirty days and a payment is to be made within ninety days. The mine is said to show values across four feet, while the entire vein will run about 20% gold to the ton.

S. S. Jones and J. S. Withers departed to Phoenix last evening, where they go on business. Mr. Jones to meet with the association of mine owners and Mr. Withers to try to attract the attention of State Engineer this way, or to find some remedy for the Engineer's lack of attention. Mr. Jones and the other mine owners or managers have formulated a bill for the consideration of the legislators in the matter of the taxation of mines, which they hope to have considered. There are now three measures touching on the taxation of mines before the legislative body, but it is thought that all will fail, the legislators having but a few weeks more of life.

The Arizona legislature passed the bill appropriating \$25,000 to build a bridge across the Colorado river at Needles, provided the general government and the State of California will appropriate a like amount for the same project. A bill of like nature passed the legislature some time ago in the matter of a bridge across the Colorado at Yuma.

Tom Steinburg is still opening up his mining property south of Kingman and reports having found something exceptionally good. The veins are well defined and carry good milling values in gold.

Best Known Cough Remedy.

For forty-three years Dr. King's New Discovery has been known throughout the world as the most reliable cough remedy. Over three million bottles were used last year. Isn't this proof? It will get rid of your cough, or we will refund your money. J. J. Owens, of Allendale, S. C., writes the way hundreds of others have done: "After twenty years, I find that Dr. King's New Discovery is the best remedy for coughs and colds that I have ever used." For coughs or colds and all throat and lung troubles, it has no equal. 50c and \$1.00 at H. H. Watkins.

The federal court will hold its April session at Phoenix on the 21st day of April, Judge Morrow, of San Francisco, setting that date for the convening of the federal grand jury. O. D. M. Gaddis has been selected as one of the grand jurors from this county. A panel of fifty trial jurors have been selected and will be summoned by the marshal within a few days.

After expending 10,000\$ on the national highway Apache county has put before the people a proposition for the issuance of 25,000\$ in bond to complete the work. The county already has an excellent road system running into New Mexico and it is the intention to complete the good work so that transcontinental automobile travel may be induced that way.

Wines Barred at Capital Functions.

A Washington dispatch says: It is stated that the Wilson-Marshall administration will be a "white-ribbon" affair, with no wines or liquors served at any entertainment. Not only do the President and Mrs. Wilson and their daughters 'taboo' the sparkling cup, but so also do the Vice-President and Mrs. Marshall, Mr. and Mrs. Bryan and other members of the Cabinet.

When Secretary of State and Mrs. Bryan had the British Ambassador as a luncheon guest Mrs. Bryan announced that neither she nor Mr. Bryan drank wines and she knew Mrs. Bryce did not.

Some years ago Mrs. John B. Henderson caused the wines in her home to be emptied into the gutters in an effort to stop the tendency in Washington society to too free use of wines and liquors. While the results of Mrs. Henderson's efforts were not far reaching, the move of President and Mrs. Wilson, Vice President and Mrs. Marshall, Secretary of State and Mrs. Bryan and others at least puts a quietus on wine drinking when they entertain and are entertained.

Reliable reports come from Mayer that the Binghamton mines, on the Agua Fria river, and lying parallel to the Copper Queen, are to be revived immediately. This action is said to have been reached by ex-State Senator Reynolds, of New York, and I. T. Stoddard, of Phoenix, the principal owners. Arrangements are being made to place a force of miners at work immediately, and it is said the property will be in charge of Charles Carmen. Mr. Stoddard was a visitor to the camp this week, to perfect plans for operations to begin. The successful handling of the Copper Queen, which has passed the stage of a prospect and is now rated as one of the mines of the future, is one of the inducements for reviving the Binghamton, in which there are many hundred feet of development in shafts and tunnels.—Prescott Journal-Miner.

Card of Thanks.

To the many friends that so ably and energetically assisted in the saving and attempting to save my property at the recent fire that destroyed the Kingman House I owe a debt of gratitude. MRS. ROSE JUNGLE.

Get the Habit

of coming to our store when you are in need of medicines but remember we have many things besides drugs and chemicals that we can supply you to advantage, such as household articles of all kinds, including dyes and dye stuffs. We sell, recommend and guarantee the celebrated Putnam Fadeless Dye. They color silk, wool and cotton at one boiling.

Charles Buffen has bought the residence of C. M. Stowe, on South Front street.

An Epidemic of Coughing

is sweeping over the town and young and old are alike affected. Foley's Honey and Tar Compound is a quick safe reliable family medicine for coughs and colds. A. S. Jones of Lee Pharmacy, Chico, Calif., says: "I consider Foley's Honey and Tar Compound has no equal, and is the one cough medicine I can recommend to my friends, as containing no narcotics or other harmful properties." Refuse all substitutes and take only Foley's Honey and Tar Compound. H. H. Watkins, Druggist.

Notice of Hearing of Petition for Probate.

In the Superior Court of Mohave County, Arizona
In the matter of the estate of
ALICE E. STOWE, Deceased.
Notice is hereby given that a petition for the probate of the Will of Alice E. Stowe, deceased, and for the issuance of Letters of Administration, with the Will annexed, to C. M. Stowe, has been filed in this Court; and that Monday, the 14th day of April, 1913, at 9 a. m. of said day, and the court room of said court at the courthouse in said Mohave county has been appointed as the time and place for hearing said petition, when and where any person interested may appear and contest the same, and show cause, if any he has, why said petition should not be granted.
Dated March 21st, 1913.

L. M. TEALE,
Clerk of the Superior Court.
First insertion March 22—April 5

A Woolen Sock

May be a handy place for your money—but it's awfully unsafe—and not much profit in it either. How much better to have your savings in our **Strong Bank**. Assets of over a Million Dollars make it strong. Twenty-Six Years of Banking Experience helps too. Besides you can earn 5 per cent interest on your Savings.
